

SAFETY & ENVIRONMENTAL DECLARATION

IN COOPERATION WITH
silén

WELL-BEING, HELATH AND SAFETY

The complete line of LIKO-S acoustic booths are manufactured with only materials that conform and comply with the strictest safety regulations, including those pertaining to the use of harmful chemicals.

LIKO-S products are engineered and designed to give users the best possible experience while always prioritizing their well-being, health, and safety.

SOCIALLY RESPONSIBLE

In addition our responsibility to our planet plays a key role in how we source and evaluate materials used in our products. We comply with the environmental legislation and operate in a socially responsible manner.

reduce formaldehyde emissions and airborne toxic contaminants

the world's most stringent formaldehyde emissions standards for composite wood products

marking of wood panels

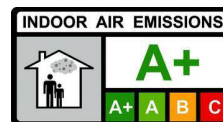

combustible materials - very limited contribution to fire

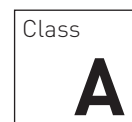

lowest emitting carpet and adhesive on market

wood harvested from forests that are responsibly managed

highest level of certification VOC (volatile organic compounds)

highest sound absorption class
